Technical + HR Interview
(15-20 mins)

Online Assessment

Cognitive and Technical assessment + Coding Assessment

Cognitive and Technical assessment

Format: 90-minute assessment consisting of two sections, totaling 90 MCQs.

Sections-1: 50 MCQs (Cognitive Skills):

- Verbal Reasoning: 17 questions
- Abstract Reasoning: 15 questions
- Critical Reasoning: 18 questions

Sections-2: 40 MCQs (Technical Skills):

- Pseudo Code: 18 questions
- Common Applications & MS Office: 12 questions
- Cloud and Network Security: 10 questions

Note: You must pass the online assessment to continue to the coding round; otherwise, you will not be eligible for further process.

Coding Assessment

Format: 2 coding problems with easy to medium difficulty.

Details: Candidates are given 45 minutes to solve both problems. Passing all or most test cases is key to moving forward.

Note: This stage contains 2 coding questions per set. Each candidate will receive a randomly assigned set with questions in a jumbled order.

Communication Assessment

- **Reading:** Assess clarity and fluency.
- **Repeating:** Test active listening and recall.
- **Q&A:** Answer questions to demonstrate comprehension.
- **Sentence Building:** Assess grammar and coherence.
- **Storytelling & Speaking:** Evaluate structured thinking and verbal skills.

Note: Non-Elimination Round

Technical + HR Interview

- Self-introduction by the candidate
- Discussion on projects, including challenges faced
- Questions on handling difficult situations
- Favourite subjects
- Resume based questions
- Personal achievements
- General HR Questions
